### Restriction/Election Requirement

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-33 and 36, drawn to a method, system, and computer program product for generating coordinates of corresponding building blocks, classified in class 702, subclass 19 and 22.
- II. Claims 34, 35, and 37, drawn to a method for analyzing a combinatorial library, classified in class 702, subclass 19 and 22.

The inventions are distinct, each from the other because:

Inventions of Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.P.E.P. § 806.04, M.P.E.P. § 808.01). In the instant case the different inventions are directed to methods, system, and computer program product having different functions, different effects, and different modes of operation. The function(s)/mode of operation of Group I is to obtain mapping coordinates, obtain building block features, infer a mapping function, and encode the mapping function to a computer readable medium. Whereas the function(s)/mode of operation of Group II is to compute a descriptor, select a training subset of products, map the training subset, identify reagents, train a combinatorial network, identify reagents, and mapping the trained combinatorial network. Thus, Groups I and II have different functions, different effects, and different modes of operation.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art because of their recognized divergent subject matter and the search for <sup>nonpatent literature</sup> <sub>12/8/03</sub> <sup>mtk</sup>

Art Unit: 1631

required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

*INVENTORSHIP AMENDMENT*

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).
